

Monday Morning Ticker from February 5, 2007

IBM EGL Training from February 28th - March 1st in Stuttgart

The brand new Version 7 of IBM's business language EGL is here! Our training session will give you the chance to gain superior knowledge and get to know the new possibilities for System i customers for yourself. Contents: The basics of programming in WDSC, structures, elements and user interface creation in EGL. Because PKS has been specialized in the modernization of legacy applications since 1988, the migration of older applications to EGL will also be a focus of the training program. Training agenda and registration at:
